

Family Connects

10-week programs

Begins March 11 & 12, 2025

**Two Group Offerings:
(Separated based on ages)
Open to ages 4-10**

**Tuesday or Wednesday
6:30pm-8:00pm**

Our 10-week program is a sensory-rich, attachment focused, and trauma-informed experience led by a multidisciplinary team who utilize Trust Based Relational Intervention (TBRI) and sensory integration.

Children engage in interactive activities, while learning to manage their bodies and emotions, how to express needs in a healthy manner, and experience felt safety with trusted caregivers.

Caregivers and **parents** will join a supportive environment. Strategies learned are coordinated with the children's program for greater success. Families experience new **calm, connection, contentment, and changed behaviors.**

**Coordinated Parenting Group *and* Children's Group
to Benefit the Family As A Whole.**

This program was made possible with funding from UMass Memorial Medical Center.
